A geographic information system (GIS) is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data. GIS applications are tools that allow users to create interactive queries (user-created searches), analyze spatial information, edit data in maps, and present the results of all these operations.

Another key leadership skill is developing political acumen. This is not about being political or being a master manipulator. Acumen means accuracy and keenness of judgement or insight, so political acumen is the ability to accurately perceive and judge the formal and informal influences that shape decision making.
