inter corporate business engineering pdf

Business Engineering (Davenport 1993, IMG 1994, Åsterle 1995) is a method-based approach to transformation. Business Engineering has the goal of incorporating the transition to the networked enterprise within the business strategy, as well as implementing this strategy within processes and providing it with information system support (see Figure 4).

Organization Chart for Transition to Holding Company

An international strategy means that internationally scattered subsidiaries act independently and operate as if they were local companies, with minimum coordination from the parent company. Global strategy leads to a wide variety of business strategies, and a high level of adaptation to the local business environment.
