There are three overall class goals for this design curriculum. Firstly, it will teach basic theory for product design and development. We will discuss the design methodology including concept generation/creativity and concept selection, as a good design process generally leads to a good design outcome.

successful glider flights. Design activity is therefore cyclic or iterative in nature, whereas analysis problem solving is primarily sequential. The solution to a design problem does not suddenly appear in a vacuum. A good solution requires a methodology or process. There are probably as many processes of design as there are engineers.
