ysis of thermal systems is achieved through the application of the governing conservation equations, namely Conservation of Mass, Conservation of Energy (1st law of thermodynamics), the 2nd law of thermodynamics and the property relations. Heat Transfer: the study of energy in transit including the relationship between energy, matter, space and time.

Instructor Information for ENG 1460: Introduction to

Uses an integrated approach to show the interrelationships between thermodynamics, heat transfer and fluid dynamics, stressing the physics of each. Mathematical description is included to allow the solution of simple problems in thermal sciences.

Wiley: Introduction to Thermal Sciences: Thermodynamics

A textbook for a one-semester course for undergraduate engineering students not majoring in mechanical engineering. Introduces the fundamentals of the thermal sciences, emphasizing the physical description of phenomena, but with enough mathematics to solve simple problems.
