Topical Software. This page indexes add-on software and other resources relevant to SciPy, categorized by scientific discipline or computational topic.

Topical Software – SciPy.org

4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.

pycse - Python3 Computations in Science and Engineering

1.2 Mesh: finite element mesh generation. A finite element mesh is a tessellation of a given subset of the three-dimensional space by elementary geometrical elements of various shapes (in Gmsh's case: lines, triangles, quadrangles, tetrahedra, prisms, hexahedra and pyramids), arranged in such a way that if two of them intersect, they do so along a face, an edge or a node, and never otherwise.

Gmsh 4.1.4
