

mathematics of quantum computation pdf

Course Overview. Information is something that can be encoded in the state of a physical system, and a computation is a task that can be performed with a physically realizable device. Therefore, since the physical world is fundamentally quantum mechanical, the foundations of information theory and computer science should be sought in quantum physics.

Quantum computing is computing using quantum-mechanical phenomena, such as superposition and entanglement. A quantum computer is a device that performs quantum computing. Such a computer is completely different from binary digital electronic computers based on transistors and capacitors. Whereas common digital computing requires that the data be encoded into binary digits (0 and 1), each of which is ...

Aims and Scope: Quantum Information & Computation provides a forum for distribution of information in all areas of quantum information processing. Original articles, survey articles, reviews, tutorials, perspectives, and correspondences are all welcome. Computer science, physics and mathematics are covered. Both theory and experiments are included.

The undergraduate course. The undergraduate course, called the Mathematical Tripos, is a three-year or a four-year course. If you graduate after three years, you receive the BA degree. If you graduate after four years, you receive the BA and MMath degrees.

Transfer between courses. Successful candidates will receive one offer for one course from the Department, so you should apply to just one. There is no advantage in applying to multiple courses within Mathematics.

Welcome. The Computing + Mathematical Sciences (CMS) Department is nestled in the heart of Pasadena on the beautiful Caltech campus. CMS is home to outstanding students and researchers who share a passion for science and engineering, as well as a drive to investigate the most challenging, fundamental problems in computation and information.
