

### **philosophy made simple richard pdf**

The Unix philosophy, originated by Ken Thompson, is a set of cultural norms and philosophical approaches to minimalist, modular software development. It is based on the experience of leading developers of the Unix operating system. Early Unix developers were important in bringing the concepts of modularity and reusability into software engineering practice, spawning a "software tools" movement.

Artificial intelligence has close connections with philosophy because both share several concepts and these include intelligence, action, consciousness, epistemology, and even free will. Furthermore, the technology is concerned with the creation of artificial animals or artificial people (or, at least, artificial creatures) so the discipline is of considerable interest to philosophers.

### **Philosophy of artificial intelligence - Wikipedia**

Materialism is the philosophical belief that the world is made of material, and that there are no other types of entity (things). Everything is composed of material. Things that are not made of material, such as consciousness, are the result of actions by material. In other words, matter is the only real substance.

The Argentinian pianist Martha Argerich is known for her explosive musical temperament and staggering technique. She has over her career produced many recordings, made in studios and live concerts. Recently, a surreptitiously made MP3 of a Carnegie Hall recital by Argerich came into my eager hands.

### **Denis Dutton - philosophy / criticism / aesthetics**

It has sometimes been suggested that quantum phenomena exhibit a characteristic holism or nonseparability, and that this distinguishes quantum from classical physics.
