

### **projectile motion practice problems pdf**

Blast a car out of a cannon, and challenge yourself to hit a target! Learn about projectile motion by firing various objects. Set parameters such as angle, initial speed, and mass. Explore vector representations, and add air resistance to investigate the factors that influence drag.

Page 1 of 2 13.7 Parametric Equations and Projectile Motion 813 Parametric Equations and Projectile Motion USING PARAMETRIC EQUATIONS In the investigation you wrote a pair of equations that expressed  $x$  and  $y$  in terms of a third variable  $t$ . These equations,  $x = \mathcal{A}E'(t)$  and  $y = g(t)$ , are called and  $t$  is called the Graphing a Set of Parametric Equations

Vibrational Motion. The Vibrational Motion Toolkit provides teachers with standards-based resources for designing lesson plans and units that pertain to vibrational motion topics such as properties of vibrating objects, periodic motion, restoring force, Hooke's law, simple harmonic motion, pendulum motion, energy transformations, and the motion of a mass on a spring.

A railgun is a device that uses electromagnetic force to launch high velocity projectiles, by means of a sliding armature that is accelerated along a pair of conductive rails. It is typically constructed as a weapon, and the projectile normally does not contain explosives, relying on the projectile's high speed to inflict damage.

### **Railgun - Wikipedia**

Ballistic Cap - Often called a "windshield," this is a covering on the nose of a projectile which is intended to provide a more streamlined shape for better aerodynamic - ballistic - characteristics.. Ballistic Coefficient - Measure of the ability of a projectile to overcome air resistance. Ballistic coefficient (BC) =  $SD / F$ , where  $SD$  is the sectional density of the projectile and  $F$  is a form ...

External ballistics or exterior ballistics is the part of ballistics that deals with the behavior of a projectile in flight. The projectile may be powered or un-powered, guided or unguided, spin or fin stabilized, flying through an atmosphere or in the vacuum of space, but most certainly flying under the influence of a gravitational field.
